Summary

B.Tech Artificial Intelligence & Data Science student with hands-on experience building AI chatbots and web applications for a hospital, simulation models in MATLAB, and data-structure-driven systems in Python.

Interests

1. **FinTech:** High-frequency trading and low-latency market systems
2. **Defence:** Autonomous drones and AI for defence systems
3. **Cybersecurity:** Defence cyber operations, AI-driven threat detection and intrusion detection.

Education

Amrita Vishwa Vidyapeetham, School of Artificial Intelligence — Delhi NCR
B.Tech in Artificial Intelligence and Data Science (Semester III) — *2025 – 2029*

Naipunya Public School — Kochi
Class XII, CBSE

Presidency School Bangalore North — Bengaluru
Class X, CBSE

Projects & Experience

Financial Audit Chatbot – Amrita Hospital, Delhi NCR | *AI, Python*

- Built an AI chatbot to assist with finding revenue leakage and optimizing financial audits for the hospital.

HackerHouse Hackathon | *Team Project*

- Placed among the top 25 teams in India.

High-Frequency Market-Making Simulation | *MATLAB, Modeling & Simulation*

- Modeled and simulated a high-frequency market-making strategy and analysed its performance under execution latency.

Rural Healthcare Worker & Medicine Supply Chain Tracker | *Python, AVL Trees, Min-Heap*

- Built a tracker that uses AVL trees for fast record lookup and a min-heap to prioritise medicine supply.

Adaptive Noise-Aware Signal Detection | *CFAR, Signal Processing*

- Team project on adaptive signal detection using Constant False Alarm Rate (CFAR) thresholding in varying noise.

Hospital Management Web Apps – Amrita Hospital, Delhi NCR | *Web Development*

- Developed three web applications for hostel, employee and vehicle management.

Leadership

- **Student Representative**, B.Tech, School of AI, Amrita Faridabad.
- **Associate President**, Chitrang Cultural Club, Amrita Faridabad.
- **Head Boy** (Class X) and **Associate Head Boy** (Class IX), Presidency School Bangalore North.
- **Basketball** – played at district level; captained school and club teams.

Skills

Programming: Python, C, MATLAB; Java and HTML (AI-assisted)
Core Areas: Machine Learning, Data Structures & Algorithms, Modeling & Simulation, Computer Networks, Robotics
Tools: Git/GitHub, MATLAB, LaTeX
Languages: English, Hindi, Malayalam
